Thursday, July 17, 2014

[Buy Reprint](#)

Researcher John Lambris has devoted his career of more than 30 years to exploring the human complement system. His lab at the University of Pennsylvania, where Lambris serves as professor of research medicine in the department of pathology and laboratory medicine, was among the first in the world to map the critical sites on the human C3 protein that are responsible for its many functions and to define its complex binding dynamics to various C3 natural ligands.
